Pine Street Historic District, Cambridge Maryland
MARYLAND HISTORICAL TRUST
DETERMINATION OF ELIGIBILITY FORM

Property Name: Cambridge Historic District - SW Expansion Area
Inventory Number: 390

Address: West of Race Street and East of High Street
City: Cambridge
Zip Code: 21613

County: Dorchester
USGS Topographic Map: Cambridge

Owner: multiple

Tax Parcel Number: 
Tax Map Number: 
Tax Account ID Number: 

Project: 512 Pine Street Rehabilitation - STAR
Agency: DHCD

Site visit by MHT staff: no yes
Name: Tania Georgiou Tully
Date: 11/07/2002

Is the property located within a historic district? yes no

If the property is within a district

NR-listed district yes Eligible district yes Name of District:
Preparer's Recommendation: Contributing resource yes no Non-contributing but eligible in another context yes

If the property is not within a district (or the property is a district)
Preparer's Recommendation: Eligible yes no

Criteria: X A B C D
Considerations: A B C D E F G None

Documentation on the property/district is presented in:

Description of Property and Eligibility Determination:
(Use continuation sheet if necessary and attach map and photo)
The Cambridge Historic District - SW Expansion Area consists primarily of small frame single-family residences constructed in the early twentieth century. They are comparable in massing, scale, setback and integrity to the properties within the National Register listed Cambridge Historic District adjacent to this area. The boundaries of the district may be modified upon further evaluation and research.

National Register of Historic Places
Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in How to Complete the National Register of Historic Places Registration Form (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "NA" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

1. Name of Property

   historic name  Pine Street Neighborhood Historic District (D-390)
   other names  

2. Location

   street & number  High, Pine, Washington, etc.  
   city or town  Cambridge  
   state  Maryland  code  MD  county  Dorchester  code  019  zip code  21613

3. State/Federal Agency Certification

   As the designated authority under the National Historic Preservation Act of 1966, as amended, I hereby certify that this nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property  meets  does not meet the National Register criteria. I recommend that this property be considered significant  nationally  statewide  locally.  See continuation sheet for additional comments.

   Signature of certifying official/Title  
   Date  
   State or Federal agency and bureau  

   In my opinion, the property  meets  does not meet the National Register criteria.  See continuation sheet for additional comments.

   Signature of certifying official/Title  
   Date  
   State or Federal agency and bureau  

4. National Park Service Certification

   I hereby certify that this property is:  
   ☐ entered in the National Register.  See continuation sheet.
   ☐ determined eligible for the National Register.  See continuation sheet.
   ☐ Determined not eligible for the National Register.
   ☐ removed from the National Register.
   ☐ other (explain):  

   Signature of the Keeper  Date of Action

Narrative Description:

(Describe the historic and current condition of the property on one or more continuation sheets)
General Description:

The Pine Street Neighborhood Historic District comprises a large section of the city of Cambridge in Dorchester County, Maryland. Abutting an existing historic district on its southern and western boundaries, the Pine Street district comprises the largely African-American neighborhood that developed along its principal streets of Pine, High and Washington over the course of one-hundred and fifty years. Beginning during the first quarter of the nineteenth century on the periphery of the city of Cambridge, near the current intersection of High and Pine streets, small town lots were acquired by the city's population of free blacks. Situated on High Street near this intersection is the Waugh Chapel United Methodist Church, a large neo-Gothic brick structure rebuilt in the late 20th century as a near replica of a Victorian sanctuary built in 1901. The congregation of free black members was established in 1826. It was in this general vicinity that continuous white-owned residences and businesses ended and free black properties began. The chain of title for the former Samuel LeCompte house at 416 High Street (D-799), an early nineteenth century Federal frame dwelling, includes mention around 1860 of its adjacent neighboring property, the house and lot owned and occupied by free black Cassey Kennard. 1 The outlines and indications of a house on this lot during the third quarter of the nineteenth century point to a small one-room plan structure. 2 The earliest buildings that defined the district, those dating from c. 1820 to 1870, have not survived.

The oldest standing structures in the district include a small group of owner-occupied or rental housing dating from the fourth quarter of the nineteenth century. Several of the owner-occupied houses, built by successful black businessmen, include the Cyrus St. Clair, Jr. house (D-800) at 423 High Street, or the Lemuel Kiah house (D-801) at 523 Cedar streets. Both dwellings were designed and crafted in popular Victorian side passage, single-pile forms with decorative Victorian features. The St. Clair house features a center cross gable and a three-story corner tower. The Kiah house has a decorated turned post porch and a bracketed eave that stretches across the Cedar Street elevation. This group of owner-occupied houses, while of slightly smaller overall dimensions that similarly aged houses in other parts of the city, clearly point to the strong interest by the African-American businessmen and their families to occupy popularly stylish Victorian houses. In a less elaborate fashion, African-American Theodore Johnson financed a two-story duplex at 518 High Street that was later modified into a single-family house. It was architecturally adapted with a cross gable centered on the roof, a porch stretched across its full front, and

1 Dorchester County Land Record, FJH 4/531-32, 10 January 1860, Dorchester County Courthouse.
one of the two front doors was blocked up and covered over with later siding. Scattered throughout the district these Victorian houses rest on low brick foundations and they are covered with plain weatherboard siding that has been obscured with either asbestos shingles or synthetic sidings in aluminum or vinyl. The steeply pitched roofs, originally covered with wood shingles, now have asphalt shingle coverings. After the turn of the twentieth century, owner-occupied houses followed prevailing national tastes with the infusion of bungalow and four-square dwellings.

While there are a few score owner-occupied dwellings that date from late nineteenth and early twentieth centuries, the lion-share of dwellings in the district were company or speculatively built for workers and their families. The predominant house type is a two-story, two-bay, gable-front frame structure built on a low brick or block foundation and covered with plain weatherboard siding. Built in single settings but mostly in rows, these houses comprise the largest survival of company or speculatively built housing on the Eastern Shore of Maryland. Of the 574 contributing structures catalogued in the district, there are 329 examples of this predominant house form. One exceptional example of this house form is the Daniel O. Seward house at 635 High Street which is built with common bond brick walls and corbelled brick cornices on its side elevations. (See D-803) Rows of two-story, two-bay, gable-front frame dwellings define sections of many streets throughout the district, and they are particularly conspicuous along Washington, Phillips, Robbins Streets as well as less traveled side streets such as Park Lane, Fairmount Avenue, Pine and Moore's Avenue. Smaller examples of two-story, one-bay, dwellings, or story-and-a-half two- or one-bay gable front houses exist in fewer numbers throughout the district as well. Many of these houses retain turned post porches with decorative Victorian brackets as the sole source of exterior embellishment. Other examples have Tuscan column porches. Window sash range from six-over-six to four-over-four or two-over-two sash divisions.

Distinctive to certain streets in the district are neighborhood churches, outstanding among them are the Waugh United Methodist Church on High Street and the Bethel A.M.E. Church on Pine Street. (See D-591) The Bethel A.M.E. Church is large Gothic Revival brick structure, built in 1879 and enlarged in 1903, on the same site as the original building that housed this congregation that was established around 1847. Asymmetrical corner towers define this impressively crafted common bond brick structure, which is defined on each side by pointed arch door and/or window openings fitted with colored glass. Standing on the north side of the church is a parsonage, a two-story, gable-front frame dwelling erected during the early twentieth century.

Across the street from the Bethel A.M.E. Church is the former Hayes Drugstore, a story-and-a-half frame commercial building distinctive for its mansard roof. Down the
street to the south is another commercial building, the Jackson-Hughes store building, also known as the former Diggs' Pool Hall. The Jackson-Hughes store is a two-story gable-front frame structure supported on a low brick foundation and sheathed with plain weatherboards and covered by a steeply pitched gable roof trimmed with extended eaves. Independently owned stores and shop buildings are scattered throughout the Pine Street neighborhood and reflect the once populous activity of African-American owned commercial enterprises. Some of these businesses operated in a combined house and shop or store structure, such as the J. F. Henry House and Shop that defines the southeast corner of the intersection of Pine and Muir streets. The ell-shaped frame structure dates to the late nineteenth century.

The largest share of the standing structures that define the Pine Street Neighborhood Historic District date between 1885 and 1930 during the period in which the city of Cambridge exploded in population in general. There was sporadic and occasional construction after the Depression years during the early to mid 1940s, but by 1960 there was only sporadic construction activity. A handful of story-and-a-half Cape Cod style houses of brick or frame construction are typical of this late period of investment in the district.

Resource List:

The following is a site by site listing of the contributing and non-contributing resources that define Cambridge's Pine Street Neighborhood Historic District, which joins the formerly registered Cambridge Historic District, Wards I and III (See D-699), which was listed in July 1990. In this district there are 574 contributing resources and 26 non-contributing resources.

High Street

1. 404 High Street, Two-and-a-half asymmetrical Victorian house with pyramidal roof and multiple gables covered with slate, enclosed porch, c. 1920, Contributing, Map 301, Parcel 4450

2. 406 High Street, Two-and-a-half story Victorian with stretcher bond brick walls, segmental arched jack arches, c. 1920, Contributing, Map 301, Parcel 4449

3. 408 High Street, Two-story, two-bay gable front frame house, c. 1920, Contributing, Map 301, Parcel 4448

4. 409 High Street, Two-and-a-half story Victorian, Queen Anne style frame house, on raised brick foundation, c. 1900, Contributing, Map 301, Parcel 1801
5. 410 High Street, Two-story, two-bay gable front frame house, c. 1910, Contributing, Map 301, Parcel 4447

6. 411 High Street, Two-story, gable-front frame house, c. 1900, Contributing, Map 301, Parcel 1802

7. 412 High Street, Two-story, two-bay, gable-front frame house, c. 1920, Contributing, Map 301, Parcel 4446

8. 414 High Street, Two-story, ell-shaped frame house, c. 1900, Contributing, Map 301, Parcel 4445

9. 415 High Street, Two-story, stretcher bond brick commercial block owned by Verizon, stone window and door trim, c. 1950-60, Contributing, Map 301, Parcel 1805

10. 416 High Street, Two-story, gable-front frame store used as the “Robin Hood Shop” by the Women’s Auxiliary of the Dorchester County Hospital. The structural core of the building is an early 19th century Federal era dwelling surviving with fragments of period woodwork, particularly the original side entrance defined by a fluted pilaster, pedimented door surround featuring a round arched transom, Contributing, Map 301, Parcel 4633

11. 417 High Street, (Sycamore Cottage) One-and-a-story, gambrel roofed frame dwelling modified with single-story rear addition as a meeting house for the local Women’s Club (D-142), purportedly moved to this site during the early 19th century, Contributing, Map 301, Parcel 1807

12. 418 High Street, Two-story, two-bay, frame house with two-story wing, c. 1890, Contributing, Map 301, Parcel 4632

13. 420 High Street, Two-story, two-bay frame house with one-story shop addition on south side, c. 1900, Contributing, Map 301, Parcel 4629

14. 422 High Street, Two-story, two-bay frame house, rusticated concrete block foundation, c. 1910, Contributing, Map 301, Parcel 4628

15. 423 High Street, Two-and-a-half story, three-bay frame house with cross gable, corner tower, c. 1880, Contributing, Map 301, Parcel 1814
16. 424 High Street, Two-and-a-half story Victorian frame dwelling with multiple gables, Ionic columned front porch, c. 1910, Contributing, Map 301, Parcel 4627

17. 425 High Street, Waugh Chapel, Founded 1826, Structures erected at various times, present building erected during late twentieth century in imitation of previous 1901 building, Contributing, Map 301, Parcel 1815

18. 426 High Street, Two-story, two-bay gable front frame house, c. 1900, Contributing, Map 302, Parcel 2503

19. 428, High Street, Two-story, two-bay gable-front frame house, c. 1900, Contributing, Map 302, Parcel 2502

20. 430 High Street, Two-story, two-bay gable-front frame house, c. 1900, Contributing, Map 302, Parcel 2501

21. 431 High Street, Two-story, two-bay frame house with hip roof, c. 1900, Contributing, Map 301, Parcel 1816

22. 432 High Street, Two-story, two-bay, gable-front frame house, c. 1900, Contributing, Map 302, Parcel 2500

23. 433 High Street, Two-story, two-bay hip roofed frame house with paired windows, rusticated concrete block foundation, c. 1910, Contributing, Map 301, Parcel 1817

24. 434 High Street, Two-and-a-half story, three-bay frame house projecting gable-front pavilion, c. 1890, Contributing, Map 302, Parcel 2499

25. 435 High Street, Single-story brick commercial block with porte cochere, c. 1930, Contributing Map 301, Parcel 1818

26. 441 High Street, Two-story frame house, modern construction, Non-contributing, Map 301, Parcel 1821

27. 443 High Street, Two-story, two-bay frame house, c. 1900, Contributing, Map 301, Parcel 1822

28. 445 High Street, Two-story, three-bay frame house, c. 1900, Contributing, Map 301, Parcel 1823
29. High and Market Streets, "Carter's Cash Market" Single-story commercial block with
Stepped false-front façade, c. 1910, Contributing, Map 301, Parcel

Applicable National Register Criteria

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing)

☐ A Property is associated with events that have made a significant contribution to the broad pattern of our history.

☐ B Property associated with the lives of persons significant in our past.

☐ C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.

☐ D Property has yielded, or is likely to yield, information important in prehistory or history.

Summary Statement of Significance:

The Pine Street Neighborhood Historic District in Cambridge, Maryland is architecturally and historically significant on several counts. Primarily an African-American neighborhood, this large residential and commercial district started out as a distinctly segregated section of the city of Cambridge, inhabited by free black citizens of the county seat during the first quarter of the 19th century. Located in the heart of the former voting district is Waugh United Methodist Church, a modern structure erected on the same site as the original chapel built in 1826. A second black congregation of Bethel A.M.E. Church, was established on Pine Street in 1847, and it is represented by a large Gothic Revival brick building erected in 1903. While the Waugh United Methodist Church is a modern structure rebuilt to represent this historic congregation, the Bethel A. M. E. Church is an individually distinctive Gothic structure singularly eligible for listing on the National Register.

The Pine Street Neighborhood Historic District is defined by the most extensive collection of factory associated, repetitive form housing to remain on the Eastern Shore. Rows of two-story, two-bay, gable-front frame dwellings, or in some cases, two-story, four-bay frame duplexes, constitute a dominant percentage of the district’s contributing resources. The most common house type, a two-story, gable-front, two-room plan main block with rear kitchen, was built in distinct rows on narrow lots that minimized street frontage and maximized the number of dwellings on a specific parcel. Assembled with a lightly framed skeleton, the houses were often finished with a decorative front porch of turned posts, sawn corner brackets and slightly extended eaves with returns. Variations on this predominant form include slightly shorter story-and-a-half examples as well as those of only one-bay width. Intact rows of these houses line many of the principal and side streets.

Intermingled within the rows of company-type dwellings are individual examples of late 19th century Victorian and early 20th century bungalow or four-square dwellings built on modest scales indicative of the narrow lot lines and/or the typically more conservative budgets of African-American owners who financed dwellings during this period. The Cyrus St. Clair, Jr. house at 435 High Street is a distinctive example of the century old, owner-occupied houses built by the successful black business class of the late 19th century. Another is the Lemuel Kiah house, a two-and-a-half story, three-bay cross gabled dwelling located at 523 Cedar Street.

The district includes as well a host of small frame commercial buildings, former stores or shops, that housed African-American businesses which served the resident population that increased steadily during the late 19th and early 20th centuries with the overall growth of Cambridge’s industrial and commercial base. The commercial and economic growth of the
Second Ward peaked with the rest of the city and county during the late 1920s and then followed a distinct stagnation after the 1929 stock market failure and attendant depression.

Historically, the Pine Street Neighborhood, politically the Second Ward voting district, is known for being the first Eastern Shore jurisdiction to elect its own African-American councilman, Joseph I. Collins, in 1882. A second black representative, H. Maynadier St. Clair, also a resident of the Second Ward, served on the county council from his initial seating in 1894 to his retirement from the post in 1946.

Resource History and Historic Context:

For the century after the founding of Cambridge in 1684, the history and development of the African-American presence in the county seat are clouded by incomplete records. Scant references to African-Americans are found in the local land records where they are identified as slaves and servants for the dominant Anglo-American planters and merchants who settled Dorchester County during the late 17th and early 18th centuries. In like manner to the balance of Eastern Shore, 17th and 18th century servant labor was mixed between indentured whites or imported slaves from Africa or the Caribbean islands.

By the mid-eighteenth century the population in Dorchester County had grown substantially since its settlement during the 1660s. In 1755, the white population stood at 8,138 while the number of slaves totaled 2,635. The number of free black residents for Dorchester County was established at 77. The proportion of the total county population that resided in Cambridge during the mid-eighteenth century has not been firmly established, but the county seat, like most in Maryland, remained small throughout the course of the 18th century. By the first decade of the 19th century, the adult white population of Cambridge stood around 300, while the slave, free black and mulatto totals are unknown. A conjectural population of slaves and free blacks, drawn from general percentages reflected in overall county totals, would suggest that no more than 100 slaves resided in Cambridge and probably no more than a few score free blacks occupied or leased town lots by the turn of the 19th century.

Whether freed through manumission or outright self-purchase, the numbers of free blacks in Dorchester County were on the rise as they were across the entire lower Eastern Shore

---

after the Revolutionary War. During the 65 years between 1755 and 1820, the number of free black residents in Dorchester County had swelled from 77 to 2,496.\(^5\) Aiding in the process of manumission of slaves and the abolition of slavery altogether were the Quaker and Methodist congregations spread across the Eastern Shore. Methodism, as expressed by its early leader John Wesley and itinerant ministers Francis Asbury, Freeborn Garretson, Henry Boehm and others, took strong stances against slavery during the 18th century and continued to level criticism of the institution throughout the early years of the 19th century. As a result free blacks across the Eastern Shore gravitated to the new Methodist churches as they developed across the region.

Itinerant Methodist minister Henry Boehm traveled through the lower Eastern Shore just after the turn of the nineteenth century. On a visit to Cambridge in August 1802, he stated

"...In the evening met with the Bl(acks). The Lord’s among these people, felt my soul much blessed while I was endeavoring to encourage the poor slaves, Bless the Lord, that nobody can hinder them from having free souls...\(^6\"

In Cambridge the group of free black residents, many of whom had worshipped at the Zion M. E. Church since it founding in 1800, established the Waugh M. E. Church in 1825-26 with Zion as its parent sponsor. Under the auspices of the Zion M. E. Church, a lot on High Street, part of “Nevitt’s Double Purchase,” was acquired “for the use and benefit of the people of colour.”\(^7\) In July 1825, Dr. Edward White conveyed to the trustees of the Zion church ten square perches on Cedar Street for the purposes of a burying ground.\(^8\) Built on the one-acre lot on High Street was a single story frame structure initially known as Waugh Chapel, named after the itinerant Methodist minister Beverly Waugh (1789-1858), who started work in the Baltimore Annual Conference in 1809. Adjacent to the Waugh Chapel on High Street and along neighboring Pine Street, the free black residents of Cambridge purchased small parcels during the second quarter of the 19th century forming a distinct African-American community. On April 1, 1837, Hester Ann Jenifer (formerly Hester Ann Devine) acquired a half-acre lot from John Bradshaw for $50, and the deed named her and her children, Harriet Elizabeth and Jacob Jenifer, as legal owners of the property.\(^9\) Her husband Benjamin Jenifer, still a slave at that time, was prevented from owning property. The lot was next to Waugh Chapel.

Nearby on Pine Street, a small half-acre lot was transferred between Baltimore countians. Daniel Johnson and John Driver, both identified as free colored men in the 1826 transfer. Twelve years later, the Pine Street lot was sold by John and Nancy Driver to Eliza Cornish for $32.50. Over the course of the second quarter of the 19th century, the land along High and Pine streets to the southern boundary of Cambridge and beyond was further subdivided and sold to a mixture of whites and free blacks for building lots and businesses. Most likely one of the most dominant fixtures on Pine Street at its intersection with Cedar Street was a windmill that turned on a pivot or post, not unlike the reproduction Spocot Mill (D-58) or another erected on the Neild farm near Cambridge that dated around 1840 (See Figure 2). Located in what was then classified as the “suburbs of the county seat, the 100’ by 95’ mill seat parcel was developed by William Rea, a prosperous white entrepreneur during the second quarter of the nineteenth century. The mill property was part of a larger 2-acre tract that William Rea had purchased from Thomas J. H. Eccleston in April 1838. William Rea sold the mill property to Caleb Shepherd, a successful miller and owner of eleven slaves at the time of the 1860 U.S. Census.

The Rea-Shepherd investment and operation of an industrial/commercial complex at the intersection of Pine and Cedar streets during the second quarter of the nineteenth century surely served as one of the catalysts for free black residents of the town to purchase small acreages nearby. One of the earliest conveyances was to free black John Jackson, who shared in the purchase of halves of a lot with his brother Draper in 1842, and the conveyance identified the property on Pine Street, “as now enclosed...being one half of the said lot of land wherein a new house has lately been erected.” Four years later, Caleb Shepherd sold a 100’ by 95’ lot on Pine Street to free black Thomas Plowman for $75, a parcel that was next to or near the windmill.

Confirming further strength of the growing nature of the free black population in Cambridge at the same time was the formation of the Bethel African Methodist Episcopal Church in 1847, and the Baltimore Annual Conference named free black Simon Brown as a trial...
minister to the fledging congregation. Late in 1847, a deed was executed between Thomas Henry Handy and his wife Sally to church trustees, Simon Brown, Washington Jolly, Henry Washington, Joseph Brown, William Banks, William Hill, Chamberlain Bowley, and Joseph Marine. A church was not erected on the lot immediately, since the new congregation met across the street on a lot leased from Dorchester Sheriff William B. Dail in return for a mortgage that was written against the lot purchased in 1847.

A graphic representation of Cambridge’s African-American neighborhood at mid-century is represented on the U.S. Coastal survey map executed in 1848. The densest concentration of development indicated on the survey map is clearly clustered along High, Poplar and Race streets where white investment in Cambridge’s residential and commercial districts was concentrated since the late 18th and early 19th centuries. Distinctly delineated along the southern section of High Street and intersecting Pine Street down to Washington Street are small, quarter-acre and half-acre improved lots with large undeveloped parcels located in the center of the triangle formed by the High, Pine and Washington.

Further evidence for the growth of the neighborhood is reflected in another deed written in August 1850, when Araminta and Margaret LeCompte conveyed to Cyrus St. Clair the house and lot where she resided “near the outlines of Cambridge and on High Street extended and between the African M. E. Church and the house and lot belonging to the heirs of the late Woolford Stewart.” The size and prominence of Cambridge’s free black population during the mid 19th century is measurable by the 1860 U.S. Census that specifically lists all of the free inhabitants in the town of Cambridge. There were 330 free black residents, 149 male and 181 female, whereas the total white population had reached 798 residents. In contrast to the free black residency in the town, there were 752 blacks that remained in bondage.

The free black community in Cambridge was strengthened with the formal conveyance of the Waugh Chapel property to black trustees on the first day of January 1865. The deed from the Zion M. E. Church trustees stated:

Witnesseth that in consideration of the adoption of the New Constitution of the

State of Maryland and the Emancipation of the people of colour of said State, and in further consideration of one Dollar current money, we...Trustees of Zion Chapel in the Town of Cambridge do grant unto Benjamin Jenifer, James Kennard, Jasper H. Combish, Thomas Henson, Nathaniel Young, John Pinkett, William Banks, Edward James & Cyrus St. Clair, free people of colour, and trustees of Waugh Chapel and their successors in trust forever, for the use and benefit of the people of colour of the Methodist Episcopal Church...

In contrast to the emergence of a strong black neighborhood along High and Pine streets in Cambridge, enslaved blacks resided in various spaces afforded them by their white owners. As remembered by young Thomas Jackson (1851-1952) towards the end of his life,

My mother and father must have been field slaves for I don't remember them being in the 'big house.' We lived in quarters attached to the back of the big house. The big house stood facing Front Street (now called Race) at the spot where Phillips Hardware now is...There were three other houses around us. Dr. Handy lived across the street where McCrory's is.

While Cambridge remained relatively small and inconsequential commercially prior to the 1850s, the second half of the 19th century witnessed dramatic changes that transformed the town. With the close of the Civil War in 1865, many newly freed slaves gravitated to Cambridge as internal railroad and harbor improvements were implemented during the 1860s and 1870s. Thomas Jackson recalled,

We had some time when the first railroad tracks were laid out in Cambridge. I worked as a water boy to the men laying the tracks. Folks used to drive down in their carriages to see the sights. The first track, I remember, was laid from Cambridge to Jacktown.

The Dorchester & Delaware Railroad finished the line between Seaford, Delaware and Cambridge in 1867-68. Five years later the federal government authorized the widening and deepening of Cambridge Creek, a project that was known as the Cambridge Harbor Internal Navigation and Wharf Company. Improvements were completed in 1873. A deeper harbor and a spur line to the east coast railroad network spawned new industrial and commercial investments along Cambridge Creek that fostered a boomtown economy in Cambridge during

28 Ibid.
the third and fourth quarters of the 19th century. By testimony of the 1870 U.S. Census for Dorchester County, the population in Cambridge was changing distinctly. While the total white population had remained fairly constant since 1860 with 837 residents, an increase of only 39 individuals in 10 years, the black population more than doubled to 715.\textsuperscript{29} The focus of black employment included wide spectrum of duties; 108 women worked as domestics, 77 men as day laborers at various jobs in agriculture or newly formed industries, 13 worked on the water as fishermen or sailors, 6 as waiters, 10 in new factories or packing houses, 2 on the railroad, 4 as carpenters, 6 as draymen, 3 ship carpenters, 1 bricklayer, 3 wood sawyers, 3 barbers, 2 ministers, 2 blacksmiths, 2 carters, 1 cooper, and 1 butcher. A 18-year-old Solomon Moore was serving in the U.S. Navy, and Henry Kennard was listed as a “disabled soldier,” he had participated in the Civil War as a private in Company H of the 39\textsuperscript{th} Colored Infantry.

One of the most financially successful black residents was farmer Anthony Driver, who is listed as owning real estate and personal property valued at $2800. Another was brickmaker David Wing, who owned property valued at $1,000.\textsuperscript{31}

In a memoir of his life in Cambridge during this period, Colonel James Wallace, a former attorney and officer in the Union army, wrote a summary of the economic activity prior to the railroad, channel and wharf improvements. “Up to this period [1870] our population was only about 1,200 souls. One day steamer, running twice a week from Baltimore and back, and one small sail vessel making a trip once in two weeks, represented our commerce and carried all our travelers and trade. We had two blacksmiths, three tailors, three shoemakers, one carriage-maker, two wheelwrights, one painter, half a dozen carpenters, two newspapers and about six or eight stores.”\textsuperscript{32}

By the mid to late 1870s, Cambridge had spread well beyond its mid 19\textsuperscript{th} century limits, which is illustrated graphically by the city map published in the Lake, Griffing, and Stevenson atlas of 1877. (See Figure 3)\textsuperscript{33} A speculative expansion of the city east of Cambridge Creek and beyond the railroad line was mostly on paper with a few dwellings built along Maryland Avenue and its cross streets. At the junction of Cambridge Creek and the Choptank was the industrial complex of J. W. Crowell & Company that included a steam saw mill, steam grist mill and a shingle factory, built on agricultural fields that only a few decades before was not

Wallace stated,

Instead of one steamer twice a week, and one small vessel once in two weeks, her trade is represented by 4 regular steamers, 25 steamers making transient and excursion trips, 10 schooners of 35 to 100 tons, 250 schooners transient, 40 sloops from 10 to 15 tons, 50 sloops making transient trips, 50 vessels under 10 tons and two trains by rail daily. There is also received in our port for shipment and manufacture annually over 250,000 bushels of grain, 120,000 shingles and lath, 3,000 tons of coal, and about 500 tons of guano and other fertilizers. We ship over 160,000 bushels of grain, 22,700 pounds of fish, two or three hundred barrels of crabs, 28,000 crates of peaches, besides apples, and an immense quantity of small fruits. Our mills saw for shipping and building over 1,500,000 feet of lumber, our lumbermen ship nearly 1,000,000 feet of white oak ship timber, and out shipyards build about fifteen to twenty vessels annually, our canning houses consume over 15,000 bushels of peaches, and other fruits; our oyster houses over 500,000 bushels of oysters. These enterprises employ about 300 to 500 men, women and children in full operation. When the shipyards and all the enterprises are at work, there is employment given to at least 700 people. All these grant results are literally new and have been born within ten years.

By the early 1880s, the entire city was transformed by industry and commerce. Colonel

Evaluating the explosive growth in Cambridge from a different perspective, a correspondent from the Baltimore Sun entered a lengthy article that was reprinted in Cambridge's Democrat & News on October 1, 1881:

All through the summer the busy town of Cambridge, Md., has been one of the most industrious places on the Eastern Shore of Maryland. In ten or twelve years the town has nearly doubled the number of its houses, and several large industries have been added to the occupations of its inhabitants. One of the chief elements of the increase in population is the colored people after the war. These emancipated laborers are as a rule industrious and prosperous...The colored people entered upon their state of

34 Dorchester County Land Record, CL 3/624, 23 September 1871, Dorchester County Courthouse, Cambridge, Md.
35 Ibid.
freedom endowed with the habits of labor, and where they have continued this habit, and have not yielded to the temptations of strong drink, they have steadily improved their condition...Their prosperity and earnings have greatly helped the general business in the town. I rode through the colored quarter, which at the close of the war was an uncultivated waste. The driver of the carriage, a colored man, in the employment of one of the hotels, took pride in pointing out to me the things which he quickly discovered gave pleasure and excited interest. From him I learned that although the greater part of the colored men are unskilled laborers, there are several blacksmiths, carpenters, wheelwrights, and bricklayers, a number of odd men of the caulkers & c. I saw one considerable place owned by a prosperous colored man, who has brickyard and kiln in operation, the rival of a similar establishment occupied by a white man. My guide showed me a neat cottage, covered in vines, which he said belonged to himself, as well as the two acres surrounding it, planted in corn and vegetables. From the neatness and cultivation which distinguished the homes of proprietors of the soil, it was easy to distinguish the residences of owners from rented premises. I suppose more than one-half of the inhabitants of the colored quarter own their own homes, and that is a large proportion of homestead ownership in a laboring population. The quarter is laid off in two or three considerable streets; the houses are good, and all have grounds more or less extensive, and by tillage these gardens go far towards the family sustenance. Two neat brick churches afford ample accommodations for the religious...

The fundamental and mechanical industry of Cambridge is shipbuilding—Within the past few years the harbor has been deepened by Col. Craighill, United States engineer, and the facilities thus afforded by the government have greatly encouraged this industry. The little harbor is thick with masts, and on all sides the click of the caulker's tools may be...the sailing vessels built here are not very large. They are mostly schooners for the bay trade, but in each of the three shipyards which Cambridge runs there is on the stocks at this time a barge for the coal carrying business of the Lehigh Valley Railroad Company on the Long Island Sound.. The barges for which Cambridge is becoming noted carry 1,000 tons of coal for a load, and they are intended to operate for the Lehigh Valley coal fields to Boston, New Brunswick & c. It is one of the distinguishing features of Cambridge shipyards that black and whites work side by side in every department, where they exhibit equal skill and capacity.36

While the Baltimore Sun correspondent focused primarily on the shipbuilding industry on the Cambridge waterfront, hundreds of new jobs were provided by the rapidly expanding oyster and fruit packing businesses as well as other industrial and commercial concerns that offered

employment. After the turn of the twentieth century this growth trend continued an upward spiral that resulted in a broad base of oyster and fruit packing industry and as well as a host of other manufacturing and business enterprises. The Sanborn Insurance Map Company reissued a new map of Cambridge in 1930 that documents the broad diversity of businesses located within an much expanded city limits. No fewer than fourteen separate oyster canning and/or fruit packing establishments were located in the city, the largest of which was the Phillips Packing Company that had formed in partnership with principals Levi B. Phillips, Albanus Phillips, and W. Grason Winterbottom in March 1902. Over the course of the next decade, the Phillips Packing & Can Company and the Phillips Hardware Company, established by the same partners in 1904, grew to dominate Cambridge's economic life. Despite the dominance of the Phillips' family commercial empire that spread through several counties on the Eastern Shore, Cambridge and its satellite communities and far-flung trading partners supported a diverse range of manufacturing concerns that included seven individual shirt and/or underwear factories, lumber, and box and basket manufacturers that hired skilled and unskilled workers.

The explosive growth in Cambridge's industrial and commercial enterprises attracted thousands of new residents with the total population jumping from around 1,500 in 1870 to nearly 8,000 by 1900, and 10,000 citizens by 1930. New residential districts spread the city on its east, south and west sides, and every year dozens of new dwellings rose along recently platted streets. The original African-American neighborhood, focused primarily on High and Pine streets north of Washington and west of Race streets, became much denser with the additional subdivision of larger parcels within as well as beyond these principal streets during the period between 1880 and 1910. A new generation of housing was built along the principal streets, and some prosperous black residents emulated the stylish Victorian dwellings rising on other city streets. In May 1888, Cyrus St. Clair, Jr., the son of a former free black who had resided on High Street since the 1850s, joined in the prosperous family butchery business and purchased a house and lot on High Street just north of the Waugh M. E. Church for $350. He and his wife financed construction of a replacement dwelling that followed the prevailing taste of the time with a center cross gable enriched with a sawn eave decoration as well as a corner tower. Located at 423 High Street, the side hall/parlor plan dwelling, although smaller in overall dimension to many of the Queen Anne Victorian dwellings in other sections of the city, points to a clear interest by a prosperous African-American couple to build in a nationally popular style. Popular ell-shaped and towered houses of other shapes and forms were occasionally built throughout the neighborhood, especially along the principal streets of High, Pine, and Washington.

Sanborn Insurance Map Company, Cambridge, Maryland (1930), Library of Congress.
Dorchester County Land Record, CL 11/97, 4 May 1888, Dorchester County Courthouse, Cambridge, Maryland.
While a select score of residents built stylish Victorian, or later bungalow and four-square dwellings, the lion-share of the neighborhood population resided in owner-built or speculatively financed row housing, either two-story gable roofed or gable-front two-room plan dwellings, many of which were embellished with turned post porches enriched with sawn brackets. As the neighborhood grew into a denser population, parcels of land were subdivided in a manner that maximized the number of lots with narrow street frontages that dictated the construction of two-bay or one-bay wide gable fronted structure.

The African-American section of the city grew to such importance that in 1882, after city leaders had adopted an election system based on ward divisions rather than at-large voting, the first African-American, Joseph I. Collins, was elected to public office as a city councilman representing the newly created 2nd Ward. City Councilman Collins operated a “refreshment saloon” on Pine Street and he served on the council until 1888 by winning re-election campaigns in 1884 and 1885. After his retirement Collins was followed by H. Maynadier St. Clair, third son of Cyrus St. Clair.39 “Maynie” St. Clair, an educator in the segregated school system, was elected to the city council in 1894 and remained in that position until 1946.

With the substantial growth in population during the first quarter of the 20th century, the African-American 2nd Ward matured in its economic, social, and religious components. Small, independent African-American shop keepers and entrepreneurs ran their own businesses, primarily along Pine and High streets. Small groceries and confectionary stores opened at many intersections, almost on a block by block basis to serve a community that was mostly traveled on foot or bicycle and without access to automobile transportation. Individuals opened small shops as an adjunct to their house, whether it be a barber, tailor, or hairdresser. By the early twentieth century new streets in the southern section of the triangle honored the former slave and later abolitionist Frederick Douglas. On the south side of Washington rows of repetitive row housing spread along new streets as the need for more factory workers continued to rise. Phillips Street, named for the huge Cambridge employer, was defined by rows of two-story gable-front dwellings on each side of the street.

By 1930 there were four African-American churches in the populous 2nd Ward; the Waugh M.E., Bethel A.M.E., Mt. Olive Baptist, Mt. Sinai Baptist, and St. Luke’s M.E. congregations. Reflective of the prodigious growth and financial strength of the African-American 2nd Ward, the congregations of Waugh M.E. Church and Bethel A.M.E. Church, erected or improved brick sanctuaries after the turn of the century. In 1901 and 1903 respectively, the two congregations financed larger Gothic Revival brick cathedrals. Emulating national tastes and Methodist Church style recommendations, the congregation’s boards of

39 C. Christopher Brown, p. 436.
trustees employed masons to craft impressive Gothic Revival brick churches with corner towers in contrasting heights. Many black children in the neighborhood attended associated Sunday School classes. During the week, black children were educated in the 2nd Ward in three structures on Pine, High and Cross streets; the oldest of the three, the Jenifer Institute, stood next to the Waugh M.E. Church and was named after former slave, later community leader and church trustee, Benjamin Jenifer, Sr. (d. 1875).

Social activities were held throughout the 2nd Ward in black-owned restaurants or fraternal lodges. There were black chapters of the Elks, Odd Fellows, Knights of Pythias and American Legion. Local activities within the black community were published in black-run newspaper, the Cambridge Advance, which was started by W. Ashby Hawkins, in 1887. For entertainment at times, the Merry Concert Band, whose membership included "Maynie" St. Clair, S.E.W. Camper, the first black attorney in Cambridge, Benjamin Jenifer, Sr., Harry Colder, Howard Jarvis, and William Kiah, played at town functions in addition to performing on the road across the Shore.

At the close of the 1920s, the economic security and period of prodigious growth came to a crashing close with the stock market failure in October 1929 and the ensuing Depression that spread across the country. Competition for the vegetable canning business nationwide pitted Eastern Shore companies with shorter growing seasons against those firms in Florida and California with year-long seasons, and the can manufacturing business was lost to California competition as well. A host of other issues, from a new generation of expensive technological advances to stricter health and environmental laws, pushed many Eastern Shore canning firms out of the business. These reasons, as well as an aging labor force that had worked since the formative years of canning industry—many of whom were now at retirement ages—contributed to the demise of a large share of the vegetable canning business that had developed in the Chesapeake following the Civil War.

While Phillips Packing & Can Company was somewhat insulated from these problems due to its gargantuan size and diversification, the company did experience labor strife during the period when there were national efforts to unionize the American workplace overall. The most volatile event in Cambridge during the 1930s was a workers' strike in the can-producing plant at Phillips on June 22, 1937. Between 1,500 and 2,000 white and black workers walked out, shutting down the plant. Due to the strength of the Phillips family's political and economic ties,

40 Cambridge Chronicle, 31 March 1887.
41 The Daily Banner, 7 June 1991, Evelyn Wheatley, "History of Pine Street shows business provided something for everyone—including dancing to the Merry Concert Band."
the unionization effort failed although some concessions were made with the city councilman H. Maynadier St. Clair and the formation of the Cambridge Workers' Association, staffed by plant supervisors and local merchants.

The strike caused further strife in its wake with several trials and efforts to test the validity of the Cambridge Workers' Association, which was eventually replaced by the Dorchester County Workers' Association. During the World War II years the Phillips Packing Company survived with federal contracts for troop rations, but following the war, business significantly waned as continued national competition and the introduction of frozen foods sidelined demand for canned vegetables and fruits. Over the course of nine years between 1947 and 1956 Phillips Company stock declined from a high of $3.64 per share to just $.02 a share. The once mammoth employer, providing jobs to thousands of Cambridge residents, was sold to Consolidated Food in 1957. Under new management the employee workforce was reduced to a few hundred by 1962.43

With the demise of Cambridge's once expansive food processing base of employment as well as most of the other vital manufacturing enterprises along Cambridge Creek, Dorchester County entered a period of economic distress and civil strife that coincided with discontent across the nation, especially throughout the South where the lack of rights for black citizens was being questioned and tested through peaceful demonstration and/or volatile actions. The early 1960s witnessed the formation of civil rights groups and events in Cambridge, repeating what was happening across the South as local and imported activists practiced non-violent "Freedom Ride" protests about segregation and racial discrimination in public places. Cambridge drew national attention as protests moved to violence. Persistent marches and picketing outside and inside local restaurants and places of entertainment such as the Dorsett Theater and the bowling lanes elevated tensions and armed conflicts through the volatile summer of 1963. In mid July tensions exploded with armed violence after some arrests and convictions had been made concerning demonstrators. On the night of July 12, the New York Times reported,

> About 200 Negroes rushed to the aid of six white and Negro demonstrators who were being beaten up in the restaurant by white persons...The police made no attempt to enter the restaurant until the Negro crowd rushed across the street and tried to break the door down. The door had been locked from the inside...As the Negroes tried to break down the door, white spectators moved up and for nearly 10 minutes the intersection was filled by a milling, punching mob.44

---

43 Ibid.
44 Ibid. p. 85
Later that night a group of more than 250 civil rights demonstrators staged a 'freedom walk' to the courthouse, where they were intercepted by a white mob nearly three times its size demanding the release of a white individual arrested earlier that day. Rocks and eggs started to fly at the civil rights demonstrators. The violent actions continued into the evening and a writer for the *Afro-American* described the scene he had witnessed:

> For what seemed like an eternity the Second Ward was a replica of the Old West as men and boys of all ages roamed the streets, stood in shadows, and leaned out windows with their weapons in full view.45

As a result of these violent episodes that summer, President Kennedy remarked that he thought actions in Cambridge, Maryland had spun out of control and that the demonstrators "had gone beyond protest....They get into a very bad situation where you get violence, and I think the cause of advancing equal opportunity only looses." In an effort to quell any further violence, the National Guard was sent in to help maintain order.46 The soldiers were stationed along Race Street.

The local activist group, established under the name of the Cambridge Non-Violent Action Committee (CNAC) was led by Gloria Hayes (nee Richardson), granddaughter of Maynadier and Mabel St. Clair and a resident of Cambridge after her parents relocated to the Eastern Shore from Baltimore in 1931.47 She attended Howard University in 1938 and received a degree in Sociology, but returned to Cambridge after graduation. She married a schoolteacher, Henry Richardson, and worked in her family’s drugstore on Pine Street. Although her marriage to Richardson disintegrated, she remained in Cambridge with her young children, and saw in them as youngsters a disillusionment with the inequalities between blacks and whites in their lives in Cambridge as well as across America.48 Aided with her cousin, Frederick St. Clair, Gloria Richardson became more involved with the civil rights movement. In the spring of 1962, she agreed to lead the CNAC, which met with Attorney General Robert Kennedy in Cambridge during the summer of 1963 in an effort to find some middle ground on their grievances.

While a working agreement was settled on between Richardson and Kennedy, the practical application of desegregation efforts was stymied by local resistance. The following spring, Governor George Wallace arrived in Cambridge to speak to the supporters interested in

maintaining the status quo of segregation and with an additional motive in spreading his fame nationwide in his bid in the upcoming Democratic presidential primary.49 The meeting with Governor Wallace attracted an activist demonstration that resulted in Richardson’s arrest and the spraying of the crowd with tear gas. Among the activists present to protest Governor Wallace were national Civil Rights leaders Stokely Carmichael, Cleveland Sellars and H. Rap Brown, young national leaders in the Student Nonviolent Coordinating Committee (SNCC). Cleveland Sellars, on arriving on the Eastern Shore, stated,

"By the time we got to town, Cambridge’s blacks had stopped extolling the virtues of passive resistance. Guns were carried as a matter of course and it was understood that they would be used."50

In spite of rising tensions, arrests, and violence connected with the Wallace rally in Cambridge, outright actions simmered down with the passage of the landmark Civil Rights Act of 1964 that was followed by the Voting Rights Act of 1965. Locally in Cambridge, in September 1964, Gloria Richardson decided to move to New York City with her new fiancée Frank Dandridge, a black photographer Gloria met during the 1963 turbulence. After Gloria left, other leaders took charge to continue meetings, although some of the urgency had been diffused with the passage of non-discrimination legislation nationally. Local progress had been made with the slow desegregation in Dorchester County schools with 187 blacks enrolled in county schools by 1965 and almost double that number in the following year.

As part of President Johnson’s war on poverty and attitudes advanced in his administration’s ‘Great Society’ legislation, improvements on housing and jobs were advancing with the application of more than $4.5 million in federal funds in Cambridge and Dorchester County between 1963 and 1967. The bulk of the federal aid came from the Department of Housing and Urban Development for urban renewal and public housing. Training and educational programs were also implemented in the form of the Head Start program and the National Youth Corps. Cambridge opened its first Head Start program in the summer of 1965 with an enrollment of 218 youngsters, 204 of whom were black.51

Despite all of these improvements, resentment and hostilities still remained within the partially desegregated and segregated society of Cambridge and Dorchester County. The summer of 1967 was especially volatile as the civil rights movement moved its focus from the deep South to the urbanized cities of the North.52 The non-violent methods espoused by Dr.

Martin Luther King and his followers had evolved into a more militant 'black power' movement that had a more violent attitude in how to affect change and eradicate racism in American life. From her home in New York City, Gloria Richardson helped to organize a speech in late July by H. Rap Brown, who had assumed the leadership role in the SNCC that spring.53

Brown arrived in Cambridge late on July 24 to an anxious crowd of supporters who were being watched by a National Guard unit as well as local and state police. Standing atop a car near the Pine Street Elementary School, Rap Brown began an inflammatory speech with, "What happens to a dream differed? Does it dry up like a raisin in the sun?... Or does it explode?... Detroit exploded, Newark exploded... It's time for Cambridge to explode." Tensions quickly elevated in the police force as recordings of the inflammatory speech were heard, and actions were taken to cordon off the 2nd Ward and protect the central business district by patrolling Race Street. Following the Brown speech, the crowd of supporters started to disperse, although the police reported that they were trying to stop any groups from what they perceived as demonstrational marches. Police fired shotgun blasts high and low over the heads of the crowd, and a ricocheted piece of buckshot had struck Brown.54 While Brown was reported to have urged others to retaliate by burning, shooting or looting, no violence was reported and Brown was secreted out of town after being treated for his wound. Around 1:00 a.m. that night a fire was reported at the Pine Street Elementary School, although the city fire department did not sound the alarm or respond to the call for 45 minutes and then only stationed themselves on the edge of the blaze to protect buildings and property along Race Street. Not until 2:30 a.m. did firemen finally enter the Pine Street neighborhood to extinguish what was then a raging conflagration that was not extinguished until early morning hours. As the sun rose and illuminated the burned section it was clear that two square blocks and more than twenty buildings had been consumed along Pine Street.55

Once the fire was out, blame was directed in several directions; to the residents of the 2nd Ward who allegedly started the fire by burning the Pine Street School, to H. Rap Brown who supposedly instigated the event with a inflammatory speech earlier that day as well the fire department which delayed its response for several hours. As a result of his extreme losses, Hansel Greene, a black businessman whose destroyed property ranged in value around $150,000 without comprehensive insurance coverage, shot himself in a wake of the fire. H. Rap Brown was later indicted in Maryland for inciting the conflagration as a result of his radical speech.

After the hearing for the trial was relocated from Dorchester County to Harford County, and set to begin on March 10, 1970, a bomb exploded in the car of two of Brown's SNCC colleagues. Ralph Featherstone and William Payne were killed. Fearing for his life, Brown fled to Canada.56

Brown was arrested ultimately for other charges, and the trial in Maryland for inspiring others to set the 2nd Ward fire was dismissed. While further violence and incidents of arson recurred in Cambridge after 1967, the extreme tensions experienced in the mid-1960s waned as progress was made on public housing projects in Cambridge and further integration of Dorchester County public schools and places of entertainment.

1944 and 1945 and turning in a northeasterly direction to cross said Park Lane on a line coincidental with the west line of Parcel 1896 on the north side of said Park Lane, and thence following said boundary as delineated by and with the back lines of parcels located on the north side of said street, to the northeasterly corner of Parcel 1831, where the boundary turns in a right-angle direction by and with the parcels facing adjacent High Street, and heading in a northeasterly direction by and with the back lines of parcels lining High Street as delineated to the northwest corner of Parcel 1801, where the boundary turns in a southeasterly direction on course with the north line of said parcel to a point on the west side of High Street, and crossing said street in a direct line with the southwest corner of Parcel 4450, thence with the west line of said parcel and the east side of High Street to the place of beginning marked A on the accompanying district map.

Boundary Justification:

The boundary for the Pine Street Neighborhood Historic District has been drawn in association with the research on the evolutionary nature of this distinct area in the city of Cambridge that has had an African-American history of development. The boundary lines are drawn to include concentrations of contributing resources that give the district its individualistic character and identity. The district joins the existing Cambridge Historic District, Wards I and III, on its northern side.
Figure 1. Cambridge, Section of U.S. Coastal Survey, Choptank River, Maryland to Hambrook's Pt. To Cabin Creek, 1848, A. D. Bache, Superintendent, Survey and drawn by Richard D. Cutts and John Scib, National Archives, College Park, Maryland.
Figure 2. This post-set pivot windmill, c. 1840, stood on Neild farm in the vicinity of Cambridge and it is most likely similar to the one erected by William Rea on the west side of Pine Street at the point of intersection with Cedar Street. Photograph courtesy of John S. Neild.
Figure 3. Cambridge, Section of Lake, Griffing, and Stevenson Atlas, 1877.
Figure 4. Cambridge, Sanborn Insurance Map, 1891. This portion of the 1891 map shows the principal intersection of High and Pine streets and the locations of the Waugh M. E. Church and the Jenifer Institute on the west side of High. The map also indicates the significant amount of construction that had occurred along these streets since the publication of the Lake, Griffing, and Stevenson atlas in 1877.
Figure 5. Cambridge, Sanborn Insurance Map, 1918. This portion of the 1918 map shows the intensive level of development and construction which had taken place in the area of the city bounded by High, Pine and Washington streets, the heart of the historic African-American neighborhood.
Figure 6. Cambridge, Sanborn Insurance Map title page, 1930. This map shows the extended limits of the city with the population exceeding 10,000 residents.
Figure 7. Cambridge, Sanborn Insurance Map, 1930. This portion of the Sanborn Insurance map indicates the mix of dwellings, stores, schools, and fraternal lodge halls that defined the center of the African-American neighborhood along Pine Street as well as the later development along intersecting cross streets that accessed the land between Pine and High streets.
Figure 8. Cambridge, Sanborn Insurance Map, 1930. This portion of the 1930 map shows the repetitive row housing built along Washington, Douglas, and Phillips streets during the first quarter of the twentieth century.
